

Legal Sector Cloud Security Review

The kick-starter to any Microsoft security project for the legal sector.

Overview.

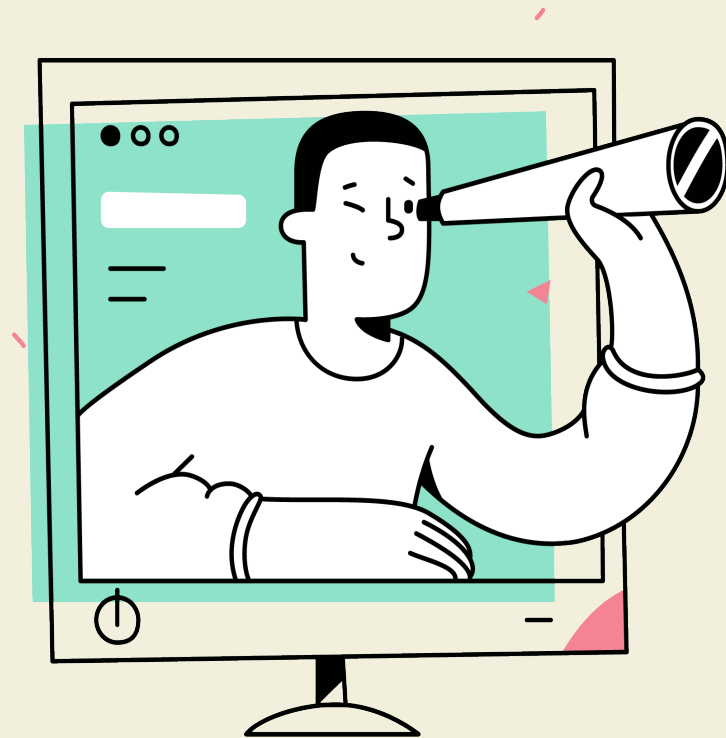

Azure's Cloud Security Review tailored specifically for the legal sector provides you with a comprehensive report on the current security posture of your Microsoft environment and the configuration health of your identity and devices.

Our security consultants understand the pressures faced by IT leaders in the legal sector. Our proven methodology based on Microsoft best practice, the CIS and Cyber Essentials frameworks, combined with decades of specialist security experience, ensures you have all the information required to improve your security posture.

The Review will also provide recommendations for the foundations required to build a secure, robust IT infrastructure.

Microsoft 365 offers advanced security services, some utilising AI and machine learning which helps reduce the risk of a breach – these can be enabled on any tenant. But before these services are implemented, it is critical to first understand your current security posture.

This is precisely where our Cloud Security Review comes in.

Key benefits.

1. Best practice. Our proven methodology is based on Microsoft best practice, and the CIS and Cyber Essentials frameworks. It's this kind of rigour (and adherence to compliance) that makes us who we are.

2. Tailored to you. Our technical specialists understand the pressures faced by IT leaders in the legal sector and have developed this review to specifically address those challenges.

3. Value-driven. It is a small, low-commitment engagement – however, it delivers actionable insights for immediate improvement.

4. Knowledge is power. At the end of the review, you will understand precisely where you are with your cloud security, and how to make it better.

5. Review and remediate. It is a self-contained, one-off piece of work. The report can be used by an internal team or a third party if you so choose (though we are confident that once you have seen what we are capable of, you'll stick with us!).

6. A safe pair of hands. With years of experience under our belts (more than we care to mention), and working with your IT team, we will ensure you have everything you need to improve your Microsoft cloud security.

What's included?

Azure's Cloud Security Review for the legal sector provides you with a comprehensive report, including:

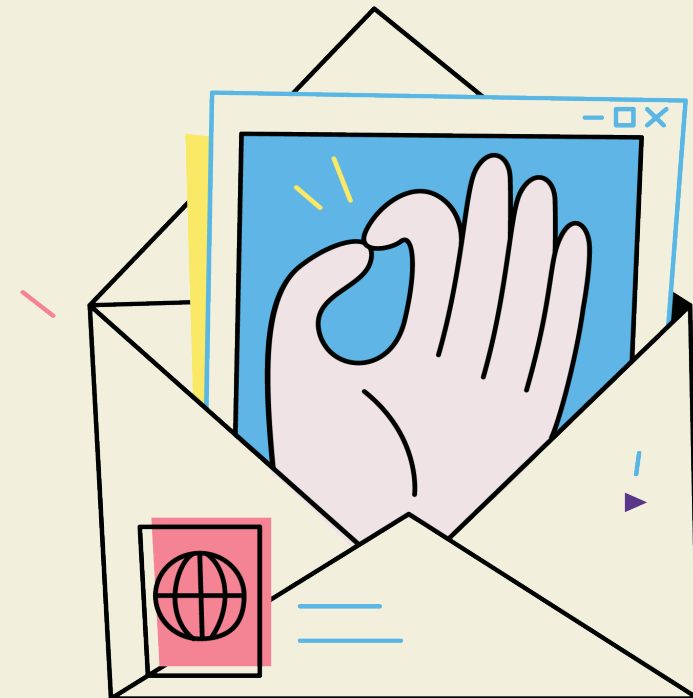

- the current security posture of your Microsoft environment.
- the configuration health of your identity.
- recommendations for the foundations to begin building a secure, robust IT infrastructure.

This review is focused on the Microsoft security pillar of Identity, specifically these solutions:

- Azure Active Directory
- Single Sign On
- Conditional Access
- Identity Protection
- Active Directory (optional)

Roadmap Workshop Reviewing the report together via a workshop allows us to step-through the report with you and your internal IT team. We will use the session to help you to develop a roadmap of events. This process ensures you really get the most out of this engagement. We prefer to run these workshops on-site if we can.

Please note: While this project does not include any resolution of discovered issues, it will include recommendations for remediation.

If we don't find any vulnerabilities, you don't pay.

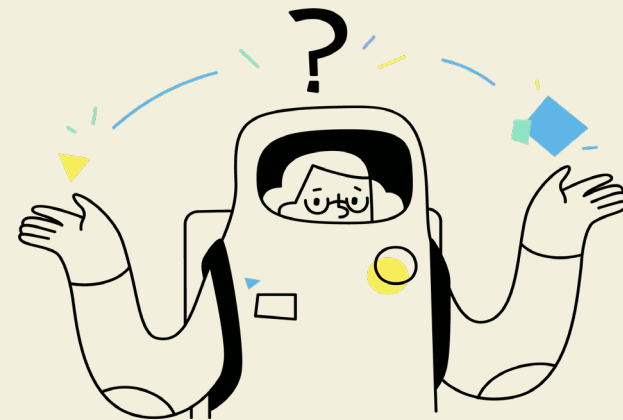

That's right. And we do feel a bit 'Victor Kiam' when we say this, but bear with us.

If, after the review is fully conducted, we were unable to find any weaknesses or room for improvement in your security posture, you won't have to pay us for our time*. And that's a double win for you – you'll be able to sleep soundly at night knowing that your cloud security has been interrogated by a team of security specialists, AND you won't even receive an invoice from us.

But for transparency's sake, please see the table below to familiarise yourself with the cost of the review, should we find vulnerabilities that need remediating. T&Cs apply (see below).

Costs

Cloud Security Review	£4,140
VAT	£828
Total	£4,968

* T & Cs

Offer applies to UK legal businesses with a valid Azure Active Directory tenant. We will need an Azure Active Directory account created with a minimum of Global Reader and Security Reader rights (these might need to be elevated to a Global Admin role and we might need to activate trial licenses to access some security assessment tools – at no extra cost). This offer is open to businesses who haven't undertaken a cloud security review with another partner in the last 12 months. Our security standards are based on Microsoft security tools, best practice and industry experience. Participants are invited to attend a follow-up workshop and provide a short testimonial based on their experience. The offer is restricted to the Basic and Core packages of the Azure Cloud Security review. We reserve the right to withdraw the offer at any time. * A vulnerability is defined as a weakness in an IT system that can be exploited by an attacker to deliver a successful attack.

Here's what our clients say:

"Azured really understands the specific pressures faced by the legal sector and treated our business with sensitivity and care. Their **comprehensive Cloud Security Review** was **low cost** and **low commitment**, yet their recommendations **dramatically improved our cloud security**. If you're in the legal business, **I can't recommend them highly enough.**"

Satish Jakhu, Managing Partner, RLK Solicitors

"The Azured Cloud Security Review visibly **improved our cloud security in a very short space of time**. The comprehensive report has enabled us to **develop a robust roadmap** for the future."

Neil Burman, IT Director, Charmill Consulting

"In this day and age, security can't be at the back of your mind – things can go seriously wrong very quickly. We want to make sure we're **always adhering to the highest standards**, especially around compliance. **Azured made it easy.**"

Ed Mitchell, Head of Platform, Future Anthem

"We were **migrating services from on-premise to Azure** and wanted a company that could deliver what we needed **quickly, securely and on budget**. Azured made sure that was possible. They ensured **security was at the heart of what we were doing**. They made the process **easy, stress-free and very simple to follow**. Honestly, they are one of the **best vendors in this space.**"

Sajid Hussein, Cyber Security Executive Officer
A global executive recruitment organisation

"Azured improved our **Microsoft Secure Score from 23% to 92%**, practically overnight. There's something very comforting in knowing you're in a **safe pair of hands** that you can trust."

Alex Manning, Head of IT, Tecknuovo

Sign me up, Scotty.

To sign up for our Cloud Security Review, get in touch with **Matt, our client engagement lead.**

We understand that not everyone chats nerd quite like we do so we've tried to keep the uber-tech to a minimum. But if you would like to chat nerd with us, **get in touch.**
