

## M365 Optimise

*By Cloud9 Security*

# Your M365 Environment: From Constant Worry to Strategic Advantage

*"I think we've had a breach..."*

*"Licensing is way over budget..."*

*"over 50% of our users aren't registered for MFA..."*

Sound familiar? As a technology leader, you're not alone. Today's M365 environment has become a maze of licensing complexities, security vulnerabilities, and hidden costs. It's keeping CTOs awake at night and overwhelming IT teams who are already stretched thin.

## A Better Way Forward

Picture your M365 environment where:

- Every licence is exactly what your users need
- Security measures work silently in the background
- Every technology decision is backed by real data
- Your team focuses on what matters, not manual checks
- Problems are caught before they impact your business

M365 Optimise, built on our innovative and powerful 365 Hound platform and delivered by our Microsoft Cloud security specialists, makes this transformation possible with ongoing expert support to ensure continuous improvement.

## Why Act Now?

The cost of inaction is growing:

- **For CTOs:** Every month of over-licensing drains your IT budget, while security gaps expose your organisation to increasing risks
- **For IT Managers:** Your team wastes countless hours on manual checks, while pressure mounts to do more with less
- **For Both:** Without proper optimisation, you're likely overspending by up to 30% on licences while operating with unnecessary security vulnerabilities

# Your Path to M365 Excellence

## SAVE MONEY AND SLEEP EASY:

- Know your users are licensed correctly and compliant
- Stop paying for unused or unnecessary licences
- Right-size licensing to match actual usage patterns
- Prevent costly compliance issues before they happen
- Get peace of mind about your licensing position

## PLAN YOUR FUTURE WITH CERTAINTY:

- Know exactly who needs new applications before you buy
- Understand pilot costs before committing
- Make informed decisions about new technology adoption
- Avoid unexpected licensing expenses

## PROTECT YOUR BUSINESS WITH CONFIDENCE:

- Keep your organisation secure as cyber threats evolve
- Spot unregistered MFA users and security risks quickly
- Monitor and improve your security score systematically
- Rest easy with automated security checks and expert reviews

## FREE YOUR TEAM FOR WHAT MATTERS:

- Reduce manual checks through clever automation
- Get instant insights when you need them
- Release IT resources for strategic projects
- Maintain continuous optimisation with expert support

## What Sets M365 Optimise Apart

Unlike standard monitoring tools, M365 Optimise combines powerful technology with ongoing expert support:

- **Comprehensive visibility** into your entire M365 environment
- **Monthly expert reviews** by our Microsoft Cloud security specialists
- **Actionable recommendations** tailored to your business priorities
- **Implementation guidance** to help you make meaningful improvements
- **Continuous optimisation** ensuring long-term value and security

# Your Success Story Begins Here: The Clear Path Framework
