M365 Protect
By Cloud9 Security

Secure your Microsoft 365 environment

In today's digital workplace, your cloud-based applications and data are critical to business success. M365 Protect, developed by our Microsoft Cloud security specialists, empowers you to maximise the security of your Microsoft 365 environment, transforming your digital workspace into a secure foundation for productivity and growth.

What is M365 Protect?

M365 Protect is our comprehensive Microsoft 365 security solution. Covering an in-depth assessment of the security of your current environment, a roadmap for improvements and critical remediation work, it's designed to address the challenge *"Are my applications and data in the cloud secure?"*.

Benefits

Comprehensive assessment
Review all aspects of your M365 environment, from email to file sharing and collaboration tools.

Compliance
Measure against regulatory standards and industry compliance requirements with built-in security and governance features.

Productivity with security
Discover how to enhance collaboration while maintaining a strong security posture.

Visibility and control
Learn how to gain insights into your cloud app usage and security status through centralised dashboards..

Cost optimisation
Maximise the value of your M365 licenses by fully utilising built-in security features.

Key deliverables

- An assessment of your current Microsoft 365 security posture

- In-depth report detailing your security status

- Prioritised recommendations for building a secure, robust M365 environment

- Two days remediation work, focusing on agreed highest priorities

M365 Protect assesses your:

Identities
- Entra ID
- Single Sign-On
- Conditional Access
- Multi Factor Authentication
- Privileged Identity Management

Devices
- Intune
- Autopilot
- Endpoint Detection and Response
- Vulnerability Management

Applications
- Email Security
- SharePoint
- OneDrive
- Teams

Data
- Information Protection
- Data Loss Prevention
- GDPR compliance
- Insider Risk Management

Implementation process

Our Microsoft Cloud security specialists follow a comprehensive process, adhering to Microsoft best practices, to deliver M365 Protect:

1 ASSESSMENT

- Conduct a thorough assessment of your Microsoft 365 environment
- Identify security gaps and areas for improvement
- Develop a tailored security roadmap

2 WORKSHOP

- Review the assessment findings in a half day workshop
- Discuss your specific security requirements and priorities
- Align the implementation plan with your business needs

3 REMEDIATION

- Implement recommended security enhancements across M365 environment
- Conduct thorough testing to ensure all controls work as intended
- Make necessary adjustments based on results and feedback

4 HANDOVER

- Review the entire implementation with your team during a workshop
- Answer questions about the new security measures
- Ensure your team is confident in managing the enhanced security environment

Pricing

Starting from £5,250 excluding VAT, depending on individual requirements. We'd be delighted to provide you with a tailored proposal following a discovery call.

Prerequisites

- Microsoft 365 licencing (Business Premium or E3/E5 recommended for full security features).

- Company size over 25 people for our standard offerings: Ensures our solutions provide optimal value for your organisation.

Why Choose Cloud9?

- **Microsoft Cloud Security Specialists**: Deep expertise in Microsoft security solutions, ensuring you get the most out of your investment.

- **UK-Focused**: Understanding of local compliance and business needs, tailoring solutions to the unique requirements of UK SMEs.

- **Proven Track Record**: High client satisfaction scores and successful implementations across various industries and company sizes.

- **Holistic Approach**: We align security with your broader IT and business strategy, ensuring a cohesive and effective security posture.

- **Ongoing Support**: Option to progress to Escalate by Cloud9, our escalation service delivered by our cloud security experts for continued assistance, providing peace of mind and rapid response to any issues.

"Cloud9 improved our Microsoft Secure Score from 23% to 92%, practically overnight. There's something very comforting in knowing you're in a safe pair of hands that you can trust."

Alex Manning, Head of IT, Tecknuovo
